Philopetes philippinus

PHILIPPINE EAGLE

The Philippine eagle, also known as the monkey-eating eagle or great Philippine eagle, is a critically endangered species of eagle of the family Accipitridae which is endemic to forests in the Philippines.

Empidonax euleri Johnstone

EULER'S FLYCATCHER

Lathrotricus is a small genus of passerine birds in the tyrant flycatcher family. They breed in tropical South America, including, for one species, the islands of Trinidad and formerly also Grenada.

Accipiter fasciatus Notula

CHRISTMAS ISLAND GOSHAWK

The Christmas goshawk or Christmas island goshawk, is a bird of prey in the goshawk and sparrowhawk family Accipitridae. It is a threatened endemic of Christmas Island, an Australian territory in the eastern Indian Ocean.

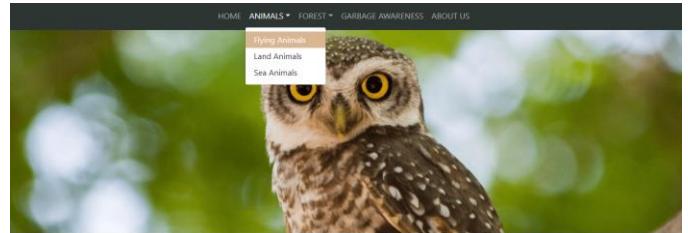

Larus audouinii

AUDOUIN'S GULL

Audouin's gull is a large gull restricted to the Mediterranean and the western coast of Saharan Africa and the Iberian Peninsula. The genus name is from Ancient Greek ἄλιος, "fish", and αἶτος, "eagle", and the specific audouinii and the English name are after the French naturalist Jean Victorire Audouin.

Addax Nasomaculatus

ADDAX

The addax, also known as the white antelope and the screwhorn antelope, is an antelope native to the Sahara Desert. The only member of the genus Addax, it was first described scientifically by Henri de Blainville in 1816.

Ursus Arctos

MEXICAN GRIZZLY BEAR

The Mexican grizzly bear is an extinct population of the grizzly bear in Mexico. The holotype was shot by H. A. Cluff at Colonia Garcia, Chihuahua in 1899. The extinct California grizzly bear extended slightly south into Baja California.

Chinchilla brevicaudata Boliviana

CHINCHILLA

The short-tailed chinchilla—also called the Bolivian, Peruvian, or royal chinchilla—is an endangered species of South American rodent, and one of two species in the genus Chinchilla. Their original native range extended throughout the Andes Mountains of Argentina northwest, Chile, Peru, and Bolivia.

Odocoileus virginianus clavium

KEY DEER

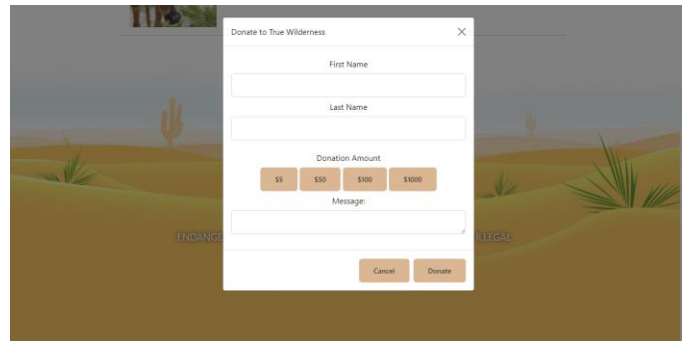

The Key deer is an endangered deer that lives only in the Florida Keys. It is a subspecies of the white-tailed deer. It is the smallest extant North American deer species.

Eretmochelys imbricata

HAWKSBILL SEA TURTLE

The hawksbill sea turtle is a critically endangered sea turtle belonging to the family Cheloniidae. It is the only extant species in the genus Eretmochelys. The species has a worldwide distribution, with Atlantic and Indo-Pacific subspecies—*E. i. imbricata* and *E. i. bissa*, respectively.

Etheostoma blennioides

BLUEMASK DARTER

The bluemask darter is a species of freshwater ray-finned fish, a darter from the subfamily Etheostomatinae, part of the family Percidae, which also contains the perches, ruffies and pikaperches. It is endemic to the western United States. It is a federally listed endangered species of the United States.

Anoxypristis canaliculata

KNIFETOOTH SAWFISH

The narrow sawfish, also known as the pointed sawfish or knifetooth sawfish, is a species of sawfish in the family Pristidae, part of the Batoidei, a superorder of cartilaginous fish that include the rays and skates. Sawfish display a circumglobal distribution in warm marine and freshwater habitats.

Sphyrna lewini

SCALLOPED HAMMERHEAD SHARK

Scalloped hammerhead sharks are moderately large sharks with a global distribution. The most distinguishing characteristic of this shark is its "hammer-shaped" head. They are threatened by commercial fishing, mainly for the shark fin trade. Two distinct population segments of the scalloped hammerhead shark are listed as endangered and two are listed as threatened under the Endangered Species Act (ESA).

BIG RED SAGE
Salvia pentstemonoides (Big red sage) is a herbaceous perennial that is rare in nature and native to only a few locations in Texas, including the Edwards Plateau. The plant remains endangered due to destruction of habitat and browsing by deer. The severe Texas drought of the 1950s may have contributed to its decline.

TEXAS POPPYMALLOW
Callitriche scaberrima is a rare species of flowering plant in the mallow family known as Texas poppy mallow. It is endemic to Texas, where it is known from about ten populations in the deep sands alongside the Colorado River.

WILDFLOWER
Wildflower, also spelled wild flower, any flowering plant that has not been genetically manipulated. Generally the term applies to plants growing without intentional human aid, particularly those flowering in spring and summer in woodlands, prairies, and mountains.

FERN
Ferns are plants that do not have flowers. Ferns generally reproduce by producing spores. Similar to flowering plants, ferns have roots, stems and leaves. Fern is one of the most popular house plants.

Penstemon Raydonii

THREE KINGS KAIKŌMAKO

Penstemon baylisiana, commonly known as Three Kings Kaikōmako and Kaikōmako Manawa Tāhiti is a species of plant in the family Penstemonaceae. It is endemic to the Three Kings Islands, New Zealand, where only one plant is known to exist. It is threatened by habitat loss.

Elaeagnus argentea

BOIS DENTELLE

Elaeagnus argentea, locally known as a bois dentelle, descriptive of its delicate white flowers is a species of flowering plant in the Elaeagnaceae family. The species was once only found close to an Indian temple at Grand Basin in Mauritius, where fewer than 10 individuals were known to grow in the 1990s.

Tilia americana

AMERICAN BASSWOOD

Tilia americana is a species of tree in the family Malvaceae, native to eastern North America, from southwest Manitoba east to New Brunswick, southwest to northeast Oklahoma, southeast to South Carolina, and west along the Niobrara River to Cherry County, Nebraska.

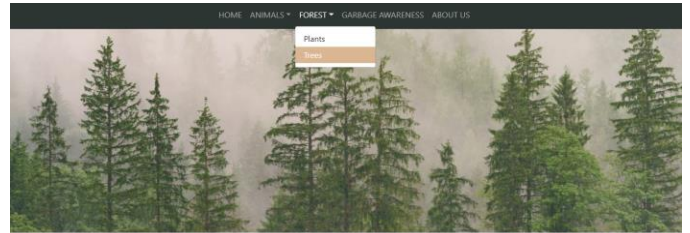

Carya ovata

SHAGBARK HICKORY

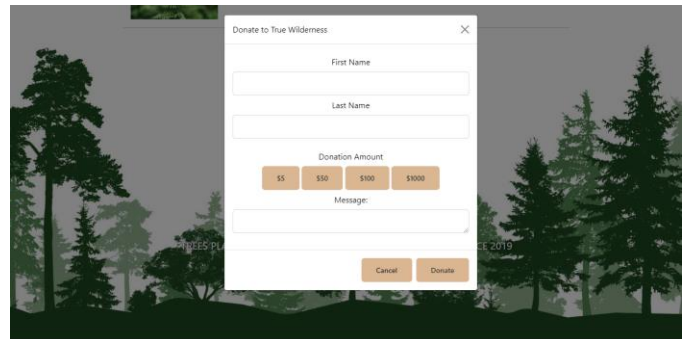

Carya ovata, the shagbark hickory, is a common hickory in the Eastern United States and southern Canada. It is a large, deciduous tree, growing well over 100 ft tall, and can live more than 550 years. The tallest measured shagbark, located in Savage Gulf, Tennessee, is over 150 ft tall.
